

Full-Stack Developer

Helder Manuel Vieira Ruiz

Jaén, Spain · www.linkedin.com/in/heldermvr
+34 616 57 43 49 · manuhelderruiz@gmail.com

PROFILE

Full Stack Developer with experience in enterprise Telco projects, specialized in frontend development with Angular and React and REST microservices integration with Spring Boot. I work with DevOps environments using Jenkins, Docker, and Kubernetes, and with Agile methodologies (Scrum) in professional teams. Analytical profile with the ability to quickly adapt to new technologies and work environments.

EDUCATION

Master's Degree in Full Stack Web Application Development, *thePower*; 2024 – 2026

Higher Technician in Web Application Development (DAW), *thePower*; 2024 – 2026

Bachelor's Degree in Physical Activity and Sport Sciences, *University of Murcia*; 2016 – 2020

EXPERIENCE

Optare Solutions, Software Developer; 01/2026 – 04/2026

- Built and maintained the frontend of the enterprise BSS and OSS portals (Angular and React) for one of the leading national fiber operators, as part of an 8-developer team (2 responsible for the frontend).
- Implemented a dynamic graph for visualizing the activation, modification, and deactivation flow of fiber services — a feature unresolved for years despite previous attempts — and an administrative panel for network resource inventory, improving overall portal performance.
- Configured CI/CD pipelines with Jenkins, containerization with Docker, and cluster management with Kubernetes (Lens) in multi-stage environments; participated in the full project lifecycle using Scrum methodology.

Freelance Frontend Developer; 06/2024 – 05/2025

- Development of responsive and scalable web interfaces using React, TypeScript, Tailwind CSS, and GSAP in personal and collaborative projects.
- Focus on reusable component architecture, usability, accessibility, and clean code, delivering modern and high-performance solutions.
- Autonomous management of the development lifecycle: planning, implementation, and code review in a collaborative environment.

Raquis: Locomotor System and Sport, Researcher; 01/2018 – 07/2020

- Participated in the first study to combine isometric force measurement with the ROM Sport battery in populations with reduced mobility, analyzing data from over 1,000 participants classified into 4 groups (with/without reduced mobility × athletes/non-athletes).
- Conducted comparative statistical analysis to identify joint range of motion patterns and develop preventive strategies, collaborating on data collection and processing in field and laboratory settings.
- Worked in a multidisciplinary team of physiotherapists, physicians, and researchers — the foundation of my transition to data analysis and, subsequently, software development.

SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Angular, Tailwind CSS, GSAP.

Backend: Node.js, Express, Spring Boot, Java, REST API.

Databases: PostgreSQL, MongoDB, MySQL, SQL.

DevOps / Cloud: Docker, Kubernetes, Jenkins (CI/CD), AWS, Git, GitHub, Linux.

Methodologies: Scrum, Agile.

AI / LLMs: Integration of AI tools (Claude, ChatGPT, GitHub Copilot) into the development and task workflow.

Languages: Spanish (native), English (B2).
